

## BRIEF SUMMARY

I am an MCA (Master of Computer Applications) student with a passion for web development and programming. As a full-stack developer, I have experience in both front-end and back-end technologies, including HTML, CSS, JavaScript, and databases like MySQL and MongoDB. I thrive in creating responsive, user-friendly websites and applications, ensuring seamless functionality and performance. I am always eager to learn and stay updated with the latest industry trends and frameworks. My goal is to continue enhancing my skills and contribute to innovative and impactful projects in the tech world.

## PROJECTS

<b>online food ordering system</b> Team Size: 1 Project Link: <a href="https://github.com/gautamkumar83431?ta">https://github.com/gautamkumar83431?ta</a> In developing a food ordering system, my role would involve both front-end and back-end development. I would work on designing an intuitive user interface, ensuring that customers can easily browse menus, place orders, and track deliveries. On the back-end, I would implement the necessary features like order processing, database management for storing customer and order details, and integrating payment gateways.
